

Module Handbook

Degree: Bachelor of Arts (B.A.)

Subject: Social Work

PO-Version: 20192

Valid for Semester: SoSe 2024

Version: 25.03.2024

- Requirement for the successful completion of studies within the standard prescribed period of study is adherence to the respective recommended semesters of a module.

- When multiple people are responsible for a module, the first-mentioned is responsible for the program

Contents

SoA-1: Artistic Foundations: Practice of Artistic Media and Procedures	3

Note regarding the examination requirements in Module 1:
Applicability: TTS, KS, SoA

Goal, Content and Literature in Module 1

Structure of the module:

In the first semester, the students choose one area of study. Within that area, they take courses amounting to 10 credit points. They visit courses in that area along with students studying KS/FK (KS/FK1) or TTS (TTS2).

WP1: Elements of the theatrical

Goal:

The students gain experience and competences in fundamental practices, forms, and techniques of performing arts. They learn about forms of theatrical storytelling and deal with the tension between seeing/showing, telling/hiding in theatrical communication. They learn to use the body and voice as elementary instruments of acting communication and interaction. They learn about the opportunities of improvisation in different constellations and with the help of various approaches. They learn to use space, body, objects or situations as a starting point of an acting practice and make foundational experience in mask theatre. They theoretically and practically deal with the development of figures in the theatre and reflect upon the figuration concerning role play. They deal with the concepts of embodiment and procedures of dramatic representation.

They can describe performative processes and performances, analyze and apply that knowledge to social work. The students have added non-verbal communications to their range of methods and can classify their artistic competencies (knowledge and skills) into the different areas of responsibility in social work (individual support/ group work and networking).

The students can name their competencies reflected in the artistic practice and locate these in the spectrum of competence requirements in social work.

Content:

- Improvisational techniques
- Fundamentals of acting and performative interaction
- Forms and techniques of artistic storytelling
- Work on role and character
- Mask theatre
- Theatre and play visits
- Play analysis

Literature:

WP2: Elements of artistic media

Goal

The students gain fundamentally practical and theoretical knowledge about material, creative and cultural features of artistic media, which form the basis for the development of a differentiated perception. They learn about the artistic techniques and technical skills related to the respective media. A starting point for the development of autonomous artistic approaches is experimental research and specification of the individual artistic intention. The students gain the competence to apply basic artistic terminology and apply related quality assessment.

The students have added non-verbal communications to their range of methods and can classify their artistic competencies (knowledge and skills) into the different areas of responsibility of social work (individual support/ group work and networking). The students can name their competencies reflected in the artistic practice and locate these in the spectrum of competence requirements in social work.

Content

The material and practical foundations of artistic media and its possibilities are taught and tried out. In their experimental studies, the students develop a workflow through artistic means in different areas and media, while mainly dealing with color, area, space, form, material, movement and time. The results are presented, reflected and discussed in plenaries, colloquia, and presentations. An interdisciplinary exchange takes place through co-teaching and tutoring.

Goal, Content and Literature in Module 2

Goal:

In this module, the students gain comprehensive knowledge about the requirements of key qualifications in the social work field. They get to know theories, concepts, and approaches of reflection and self-reflection for a professional disposition/identity and professional acting within the often tense and even paradox jobs and tasks in social work.

The gained self-critical and reflected disposition allows the students to develop a professional identity within the occupational field, while taking their own personality traits into account.

In this module, the students learn about the foundations of communication theories and become familiar with a wide spectrum of communication models, which they can apply according to their personality and various situative requirements.

Content:

The focus of the module is a reflection process, oriented at the artistic practice and own personality (strengths, values, biographical influences), while methodically guided and accompanied in order to clarify and locate one's role in relation to the interdisciplinary competence requirements in social work.

It conveys theoretical basics in the following areas:

the legal mandate; requirements of the 21st century; key qualifications and competence orientation; challenges and requirements of the field; antinomies, dilemmas, paradoxes and ambivalences; empathy.

The content of the module allows the students a reflective, proactive and critical dispute, as well as contact with the field of tension: context-specific job - self-care. The module gives knowledge of theoretical and methodical foundations of various communication theories and modules, and trains the dealing with complex communicative processes.

Goal, Content and Literature in Module 3

Goal

The students know about the central roots of social work. They can name the indicators for social work as a science and profession, and possess the knowledge in order to understand the

discipline-forming theoretical and methodical basics of the field, related to its context of origin, the professionalization as well as the current social requirements. The students are therefore able to develop their own science-based self-conception as future social workers and are able to form the professional standards of social work while dealing with and applying the discipline. They have knowledge of migration and can take on a critical position within topics of integration - inclusion - intercultural fields.

The students develop a discrimination critical view and position, within the background of the history of social work, the current challenges and scientific foundations of social work, which

recognizes diversity as an enrichment and condition for development.

The students can apply knowledge and theory-based assumptions for the interpretation of practice constellation and convey them reasonably. They get to know the different fields of social work according to its function, structure and methodical orientation and have an awareness of the multidimensionality of social situations and problems.

The module is a related foundation of the program.

Content

The focus of the module is the introduction to the history and important theories of social work, as well as an overview of various fields of action in social work.

The view of the development of social work in the historical context as a systematic foundation, as well as the reflection of the practice regarding the theory development, is an additional focus of this module.

This contains:

- the introduction to the history of social work: From earlier forms of need and poverty to industrialization, social problems and welfare, structure and paradigm shift in the Weimar Republic and the Third Reich, Youth Welfare and youth care reflected in history, a comparison of social work in East and West Germany until its current level of development
- the introduction to theory - generally and specifically justified positions, paradigms and theoretical approaches, as well as concepts of social work, i.a. science and profession theories, system theoretical basic assumptions, epistemology, life orientation
- Institutional location of social work institutions
- From migration to intercultural life. A historic overview.
- Discrimination critical view, intersectionality and gender, as well as a discrimination critical view and position, which understands diversity as an enrichment and condition for development.

Goal, Content and Literature in Module 4

Goal

In this module, the students gain basic knowledge of the central legal framework of social work. They have a basic knowledge, in part an overview, of the foundations of civil law, especially tortious acts, contracts, general and specific administrative law with a focus on the books of the social security code (SGB) in relation to the legal system. This allows them to understand and convey the legal context of various problems and act accordingly, in order to put sociological competencies into practice while considering aspects of gender, migration and demographic change. They can name, recognize and define important legal terms and principles (rules, theories), contexts, structures (construction, systems), distinctions (differences) and functions (meaning, tasks) and grasp the system of the current law. They are able to independently classify simple subjects of law, and interpret and communicate the law.

They know important legal requirements when it comes to practicing social work and can analyze their future working environment in relation to the general social administration law, the public administration, and private sponsors. The students can assess the circumstances of their clients in particular and develop solutions with the help of legal interrelations for the specific needs. The module offers foundations for the following law module SOA7, the practical project in P2 and SOA11 (multi-perspective casework).

Content

The focus of this module in the introduction is the meaning of law for social work. This includes:

- the foundation of general legal and methodical doctrine, in particular: terms and essence of law, legal sources, classification of law, field of law, subjective rights, as well as an introduction to the jurisdictional work: finding of justice, jurisdictional databases, subsumption, interpretation, case solution technique
- the introduction in constitutional law, foundations of civil law with a focus on tortious acts and supervisory duties
- overview of selected types of contracts and other relevant areas of law
- foundation of the general and special public administrative law with in reference to the remaining legal system, in particular: overview of organization and tasks of public administration, overview of government organizations, and therein the position of the social worker
- Overview of all books of the SGB

Goal, Content and Literature in Module P1

Goal

The students can autonomously work on a given task and present their results. They are able to justify their project experiences and reflect upon these. The students gain communicative competence through the artistic project work, which is reflected in the accompanying seminar. They learn about models of active listening and non-violent communication. They get to know feedback systems and learn how to use them. They possess basic abilities and knowledge of documentation and description of aesthetic processes and can present these in a portfolio as well as verbally.

Content

The students start their studies with a project week, in which they work on a specific aesthetic task in teams. They are supervised and supported by teaching staff through co-teaching. Followed by an introduction into techniques of presentation and documentation, they create a portfolio. The students learn about the fundamentals of artistic research and its location in epistemology. They learn about participatory research approaches. Subject of the related theory-practice-seminars are models of feedback culture, non-violent communication, and active listening.

Note regarding the examination requirements in Module F1:

Applicability: KS, TTS, FK, SoA

Goal, Content and Literature in Module F1

Goal

The students know the fundamentals of academic work and use this regarding the production of module examinations. They know the knowledge base of the fundamental, as well as the relational studies, which are relevant to their field. They particularly know the fundamentals of social and educational science as a chosen professional perspective. Consequently, they are able to use their scientific knowledge and reflect their professional orientation interdisciplinary. They get to know historical and current perspectives and positions of different disciplines and subjects, and can process these through concrete questioning. The overall goal of this module is the development of scientific competences, esp. sound reflection and communication capabilities.

Content

In Modul F1 the fundamentals of academic work are taught, as well as different epistemologies and their application.

Apart from the obligatory seminars, the students can choose from a range of classes in basic as well as related studies, relevant to their field. Examples for seminars in the Studium

Fundamentale are: Art theoretically valid models of interpretation, Phenomenology of perception, Types of teaching and learning.

Literature:

Will be announced in the seminars.

Note regarding the examination requirements in Module P2:

Applicability: KS, TTS, FK, SoA

Goal, Content and Literature in Module P2

Goal

The students can apply their acquired artistic knowledge and skills to a specific artistic interdisciplinary project. They are able to work in groups with students from all study fields as well as plan, execute and present a free artistic, art therapeutical or work-related project (e.g. Theater in business establishments, Projects in a psychiatric ward, Art in public spaces or art institutions, Art therapy in clinics,..).

They can reflect on their artistic work concerning the contents of the project related seminars. They can offer different perspectives concerning their work. They understand the basic steps of planning, executing and securing the results of projects. They have media competences at the interface between the arts and the sciences relevant to their studies.

In the artistic interdisciplinary projects and the following project forum, the students learn about problems and approaches during the planning and execution phase of projects in social contexts. They form peer consulting groups and profit from different ideas, impulses, and experiences. The forum offers help during the ongoing project planning and executing. The students learn to counsel and support each other.

Content

The students choose from different projects offered by teachers of the university in their area of research or plan their own interdisciplinary projects. The students plan their project with the help of various artistic mediums and types. They are accompanied by various teachers through co-teaching. They describe and document their projects and reflect on these amid project-specific theory models and fundamental thoughts in project management.

The project forum included in the module, offers students and teachers a platform to exchange project related experiences in the various praxis fields of the involved areas of study.

Note regarding the examination requirements in Module F2:
 Applicability: KS, TTS, FK, SoA

Goal, Content and Literature in Module F2

Goal:

The students know the fundamentals of the social and educational science as a chosen professional perspective in their future occupational fields. They can reflect on their artistic and scientific experiences and knowledge. They can reflect on their professional orientation interdisciplinarily. They learn how to deal with artistic processes and the scientific sources relevant to their field of study and can work on a specific question.

Content:

The focus of module F2 is on the advancement of scientifically justified reflection capability. Different scientific perspectives of the current society and fundamental problems of the human selfconception are being connected productively. The module serves the training of the reflection competences, related to aesthetic perception and the practice of power of judgment. It provides knowledge of the theoretical and methodical fundamentals of the arts and science beyond the borders of their particular discipline. It trains the interaction with complex communicative processes and leads to the acquirement of communicative competence in view of societal fields. Apart from the obligatory seminars, the students can choose from a range of classes in basic as well as related studies, relevant to their field of studies. Examples for seminars in the Studium Fundamentale are: Art theoretically valid models of interpretation, Phenomenology of perception, Types of teaching and learning.

Literature:

Will be announced in the seminars.

Note regarding the examination requirements in Module 5:

Applicability: TTS, KS, SoA

Goal, Content and Literature in Module 5

Structure of the module:

For the second and third semesters, the students choose an elective. They choose courses to the extent of 10 CP. They study along with the students from the programs KS (KS3) or TTS (TTS1, TTS3).

WP1: Elements of dancing

Goal:

The students are able to experience, differentiate and understand basic elements of human movement and body language in dance. Additionally, the students are able to use this knowledge in relation to different target groups and situations.

They can dance and relay simple dances and dance forms. The students have basic knowledge of musical contexts in dance and know about the anatomical and physiological functions of their dancing bodies. Furthermore, they are able to reflect on their experiences in conversations and discussions and give feedback to others.

The students have expanded or deepened their range of methods, which now includes non-verbal communication forms and are able to introduce artistic competencies (knowledge and skills) in the various areas of social work (individual support/ group work and networking). They have relevant knowledge of the intersection of Art/cultural education - social work. The students can transfer their reflected experience in artistic - creative processes to develop and change processes in social work and can introduce the gained or experienced personal competences into the tasks of social work.

Content:

- basic forms of classical dance
- various techniques of contemporary dance
- bodywork according to Body-Mind-Centering, Feldenkrais, etc.
- movement analysis
- Improvisation: creation of movement/Solo, Duett, Trio and Ensemble/Instant Composition
- communication in movement
- body and space
- effectiveness on a physical, mental and social-communicative level
- basic knowledge of anatomy

Literature:

- Brandstetter, G. / Klein, G. (Hrsg.) (2012): Dance and Theory. Bielefeld: Transcript.
- Calais- Germai, Blandine (2008). Anatomie der Bewegung. Marixverlag.

- Lampert, F. (2007): Tanzimprovisation. Bielefeld: Transcript.
- Lipton, Bruce H. (2006): Intelligente Zellen. KOHA-Verlag.

WP2: Elements of the musical

Goal:

The students gain basic knowledge of musical education and a refined acoustical perception. They get to know their personal voice pattern and sound quality and are able to control and develop it. They develop a sense of the connection of body dynamic, breath movement and vocal expression, which they can access when speaking as well as singing.

The students learn to express themselves through different musical/vocal materials, both soloistic and choral. They can instruct small musical units as well as choose and utilize music fitting a situation. They know the fundamental conditions of stage situations and have methods to use and modify it for their own or the vocal expression of groups.

The students have expanded or deepened their range of methods, which now includes non-verbal communication forms and are able to introduce artistic competencies (knowledge and skills) in the various areas of social work (individual support/ group work and networking). They have relevant knowledge of the intersection of Art/cultural education - social work. The students can transfer their reflected experience in artistic - creative processes to develop and change processes in social work and can introduce the gained or experienced personal competences into the tasks of social work.

Content:

- Body-Awareness, Stand and Standing, Tonus, Transsensus,
- Breath physiology and breath energy, the polar breath occurrence
- (sound) qualities of the singing and speaking voice (evaluation criteria of vocal expression), sound spaces and body centers, sound security, harmonies and formants
- sound awareness & articulation, emotionality and authenticity
- rhythm, dynamic & agogic, (speech-) melody, accent, harmony/disharmony, major/minor, intervals, solo/tutti.
- canon, mantra, scat, songs from all over the world (1-3 harmonies), interpretation of solo song, poems, and prose.
- improvisation with movement and vocal-musical expression
- fundamentals of musical theory. Music selection and use for dance and theatre productions, where different dance techniques, styles, forms, and recipients are taken into consideration. Correlation between dance movements and music for dances, improvisations, and compositions.

Literature:

- Bernhard, Barbara Maria (2014): Sprechtraining für Schauspieler, Berlin: Henschel.
- Ritter, Hans Martin (2009): Sprechen auf der Bühne. Ein Lehr- und Arbeitsbuch, Berlin: Henschel.

WP3: Elements and practice of artistic media

Goal:

The Students acquire extended knowledge in the specific techniques and procedures of the artistic media and gain insight into their proportionality related to material, concept, and result. They are able to reflect upon different artistic strategies and methods, as well as personal theoretical backgrounds and contexts. They develop an understanding of intermedial work and experimental, interactive and innovative concepts. The gained skills and competences lead to autonomous formulations and imagery, as a foundation for an art based reflection of professional roles in the context of social work. The students have expanded or deepened their range of methods, which now includes non-verbal communication forms and are able to introduce artistic competencies (knowledge and skills) in the various areas of social work (individual support/ group work and networking). They have relevant knowledge of the intersection of Art/cultural education - social work.

The students can transfer their reflected experience in artistic - creative processes to development and change processes in social work and can introduce the gained or experienced personal competences into the tasks of social work.

Content:

Through the artistic work of the students, practical and theoretical abilities and knowledge is developed and conveyed. These are tested and investigated concerning their artistic work. The results are shown, reflected and discussed in small groups, colloquia, and presentations. The mentoring of the students takes place in single as well as in group conversations.

Goal, Content and Literature in Module 6

Goal:

On the basis of Modul SOA2 and the taught theoretical foundations and practical exercises, the students have acquired a self-reflecting and professional position in dialogues. The module conveys knowledge of theoretical and methodical foundations regarding different communication models and leads to the acquisition of communicative competence.

They can reproduce the theoretical backgrounds and scientific foundations of counseling approaches (constructivism, systemic counseling, resource-oriented counseling, multiperspective approach) and comprehend the methods of counseling derived from the theoretical thoughts. They are able to prepare, structure and carry out counseling sequences. They can apply different methods according to situation and context, can analyze the strengths and weaknesses of their interventions, change their perspective, and develop alternative options.

Referring to the reflection of their artistic processes, they know of the strengths of their personality and its influences on conversations and have reflected, experienced knowledge about the development of (conversation and learning) processes.

Content:

The focus of this module is the introduction, implementation, and reflection of theoretical foundations in various counseling and conversation situations and theory-driven practices.

- Introduction and critical analysis with theoretical and scientific foundations of conversation
- practice of various methods of conversation
- practice of various methods of conversation while using artistic practice
- reflective units

Note regarding the examination requirements in Module 7:
Applicability: SoA

Goal, Content and Literature in Module 7

Goal:

In this module, the students gain a broader, partially more detailed knowledge in the areas of family and youth welfare law, in reference to the remaining legal system, with a partial overview. They can outline and explain important legal terms and principles (rules, theories), contexts, structures (construction, systems), distinctions (differences) and functions (meaning, tasks) of the mentioned areas. They can apply the gained knowledge to practical situations, recognize and present simple or rather common legal problems and questions and develop solutions while applying the juridical doctrine and methodology. The students can advocate and explain developed legal positions and recognize if legal advice is necessary. The students gain a comprehensive view of the SGB VIII and have knowledge of the services of child and youth support in the field of child and youth welfare. They gain an insight into the fundamental themed references, especially in youth sociology, social-spatial orientation in youth work and social education and can apply them to analyze practice-oriented problems in the field of child and youth support and develop solutions. The students know the relevant work techniques and methodical competences in child and youth support, can communicate these and have applied them exemplary in exercises. Particularly, the range of services for help with education is known, was looked at in exemplary fields of work and can be situated in this field of work in current requirements (flexibilization, social-spatial orientation). The students know the professional guidelines to be filled according to §§ 8a and 8b SGB VIII in different working contexts of child and youth welfare and can classify them according to youth welfare law while being system critical. They gain insight in various institutional settings and methodical requirements and can differentiate between typical circumstances of their clients, manifestations of an educational need according to § 27 SGB VIII and "credible information indicating a risk to the welfare of a child or adolescent" according to § 8a SGB VIII and develop and present appropriate solutions.

Content:

The focus of this module is the introduction into the family and youth welfare law and the deepened introduction into the field of service (advisable and mandatory services) of child and youth welfare (SGB VIII), in particular, help in education and the thematization of the social-spatial orientation in child and youth support. The areas of youth work and youth social work will be looked at further. This includes:

- Family law in reference to the remaining legal system, partially just as an overview, especially relevant areas from: marriage and family in constitution and private law; marriage law, civil partnership; domestic relations including guardianship - care; also public housing; international/European private law; adoption services and pregnancy conflict counseling
- Introduction to juvenile criminal law
- Introduction to youth welfare law (SGB VIII): overview, history of the youth welfare law; goals and task of youth welfare; rights and authorized, protection mandate, procedures, legal protection, data protection in youth welfare; sponsor and organization of youth welfare and service provision through independent sponsors; services of youth welfare; other tasks of youth welfare, cooperation with administrative staff in the field of social work.
- The introduction into the political and social educational fields of action in child and youth welfare
- Clarification of terms, definition and basic understanding in educational help as a service field in child and youth welfare
- Clarification of terms, causes and manifestations in child endangerment, handling of (impeding) child endangerment
- Forms of offering and appearance in educational help
- Exemplary case constellation and the process of help planing: insight into the specific settings, recipients, organization forms and methodical requirements for exemplary forms of help
- Effects of social data protection on the practice of child and youth welfare
- Protection concepts in child and youth welfare

Note regarding the examination requirements in Module 8:
Applicability: TTS, KS, SoA

Goal, Content and Literature in Module 8

Structure of the Modul:

The students choose from one elective, which they will study for two semesters. They study along with the students from the programs KS (KS3) or TTS (TS6).

WP1: Theatrical forms and practices

Goal:

In this module, the students get the opportunity to deepen their knowledge in artistic forms and practices. They can set individual concentration areas, like performance, forms, and dimensions of mask theatre or in areas of voice, language and song. They learn how to work in ensembles using artistic means and through that, broaden their competences in designing collective work processes. The students have added non-verbal communications to their range of methods and are able to classify their artistic competencies (knowledge and skills) into the different areas of responsibility of social work (individual support/ group work and networking).

They know about the different stages of processes, their characteristics, features, and challenges and can use the reflected experience of the artistic practice in a constructive and innovative way in social work, even if the demands change often. They are able to recognize complex problems proactively and avoid them in a solution-oriented way.

They can design open-ended processes independently, teach and define, reflect and review the goals (here: the gained artistic and personal competencies).

Content (optional):

- artistic forms and practices
- Performance Art
- Dance theatre
- Work with full face masks
- Artistic Ensemble work with voice, speech and song
- Singing

Literature:

Will be announced in the Seminars

WP2: Artistic forms and practices

Goal:

The students broaden their knowledge in specific techniques and processes related to artistic media. They are able to reflect upon different artistic strategies and processes, as well as their theoretic backgrounds and various contexts amid societal developments and phenomena. They have the ability to independently develop, implement and convey intermediate work, and experimental, interactive and innovative concepts. The gained abilities and competences lead to deepened artistic experiences and serve as a basis for an artistically based reflection of their professional role in the societal and social fields of social workers.

The students have significantly deepened their skills in non-verbal communications and are able to classify their artistic competences (knowledge and skills) into the different areas of responsibility of social work (individual support/ group work and networking). They know about the different stages of processes, their characteristics, features, and challenges and can use the reflected experience of the artistic practice in a constructive and innovative way in social work, even if the demands change often. They are able to recognize complex problems proactively and avoid them in a solution-oriented way. They can design open-ended processes independently, teach and define, reflect and review the goals (here: the gained artistic and personal competencies).

Content:

Through the artistic work of the students, practical and theoretical abilities and knowledge is developed and conveyed. These are tested and investigated concerning their artistic work. The results are shown, reflected and discussed in small groups, colloquia, and presentations. The mentoring of the students takes place in single as well as in group conversations.

Goal, Content and Literature in Module 9

Goal:

The students can analyze and evaluate specific needs from the point of view of resource orientation and the life-wide integration. They know methods and techniques of case management and have learned to use these in order to plan, design and evaluate help processes appropriately. Students can name historic and current developments in case-oriented social work, as well as outline theoretical foundations of the CM methods, taking into account the relevant societal framework and justify, and communicate their decisions with regards to various methodical approaches and conceptional orientation.

They know the phases of help plan processes and, due to their reflected artistic processes, are able to questions it critically, respond to the unexpected and develop appropriate solutions. The module requires the knowledge of lawful and organizational systems in social work, as well as services of child and youth welfare.

The students can asses and justify networks and cooperations and understand CM as an entity, that mediates life and system. They are able to document the helping process in a transparent way for their clients and understand it as a necessary means for self and peer review, as well as a legitimation of the work both facing inward and outward.

They know and respect the foundations of data protection in order to meet the needs of the informational self-determination of their clients and therefore as a quality feature of social work.

Content:

The focus of this module is the introduction, implementation, and reflection of case management processes as a theory lead practice.

- practicing various methods of communication by using artistic practices
- Introduction to case management: definition and history; setting and structure; phase models; social diagnostics; designing the help plan process and evaluation of the help process
- documentation: documentation methods; data protection and data security
- establishing and preserving networks
- casework and reflection of their own role

Goal, Content and Literature in Module 10

Goal:

The students know the requirements and main features of research approaches and can work on research questions while utilizing appropriate methods. They know the main ways of source acquisition (literature, studies, database, periodicals) and can identify and reflect specialist literature. They are able to read studies and comprehend research findings in a critical manner. They know the ethical aspects of using collected data.

Content:

- Qualitative and quantitative research approaches
- Methods of evaluation
- participative research methods
- Basics of applied research

Note regarding the examination requirements in Module 11:
Applicability: SoA

Goal, Content and Literature in Module 11

Goal:

The students can use the professional and personal skills acquired during their studies in a contextualized and fitting way. They have a wide spectrum of methods in order to process complex problems, can introduce their practically and artistically based experiences and develop new solution strategies when demands change. They can recognize the complexity of a case, analyze, obtain knowledge and accompany and evaluate it responsibly. The students are able to see the complexity of a case and accompany it resource orientedly and responsibly. They have deepened their knowledge gained in the Modules SOA 6 and SOA 9 (conversational skills and counseling / case management and networking), SOA 2 (profession specific and ethical foundations of social work), as well as their knowledge of legal, pedagogical and social theoretical foundations, and can question that knowledge critically and use it in connection of theory and practice. They possess knowledge at the intersection of other fields of work and can communicate with experts as well as lead the conversation. They can use methods of group work. The students have gained a comprehensive insight into the field of cultural education. Due to their own artistic experiences and their reflected professional position, they can examine the current discourse in the field. They are able to document and present their action and process sequence.

Content:

The focus of this module are method oriented exercises and their reflexion in groups, as well as the reflexion of their position and professional acting

- levels and phases of multi perspective position comprehension/ clarification of roles
- case work and reflection
- documentation and presentation (legitimation and argumentation)
- group work (settings in regards to existing power structures and methods)
- overview over the field of cultural education as an application in youth welfare
- reflection of the professional role including the own personality traits

As special focus is here on nonverbal, poly aesthetic expression, communication and interaction forms (practically tried as a deepened reflexion method), especially about the field of action:
cultural/artistic-aesthetic education.

Goal, Content and Literature in Module 12

Goal:

The students have a differentiated knowledge about the fields of social work, their network, and job in a societal setting. They have an overview of institutions of social work and a deepened view into the field of cultural education and its intersection.

They can present the fields of practice and their connections in a structured way, as well as explain the networks and collaborations to other specialists and various organizations. They can recognize and describe new fields of action.

The students have an overview of the organization context, that social institutions/organizations are located in, which often is a social-political setting. They also understand the meaning and the impact business administration and the human resource management have on social institutions and have an insight into the construct, the finance and the legal environment of a social institution.

They are able to recognize the tension between social contract and the framework of social work and can discuss it critically.

They have knowledge and practical experience of participative, methodically diverse large group methods and can reflect upon this by taking into account their artistic knowledge and experience connections.

Content:

The focus of this module is the introduction into the fields of practice/ institutions of social work and their characteristics and interactions. complemented is this through practical tools for the professional practice in the fields of practice related to the field of study

- Introduction to the fields of practice and various institutions
- basic conditions of social work in the tension field of societal assignment and personal position
- possibilities and boundaries of social work
- introduction to theories and practice of large group methods
- foundation of teamwork

Goal, Content and Literature in Module 13

Goal:

The students have familiarized themselves with the practice of social work and the related administrative activities. They have deepened their expertise with a practical orientation. Based on the professional skills acquired, the students can work independently in the field of social work. They can perform practical tasks while taking into account the legal, organizational and ethical framework. They are able to introduce reflected experiences through various methods in different settings. They can fall back on artistic experiences made during their studies, using it as a reflective foil for their professional position.

The students can evaluate social work with the help of different methods and communicate their research results as a contribution to the professional discourse. In recourse to their practical experiences, they can observe and analyze social-political developments.

Content:

The students choose one or a maximum of two institutions of practical social work, in which they will spend their practical period of study. They will be mentored by a state-approved social worker or a state-approved social education worker, which has at least two years of work experience.

The students are accompanied by the school for the preparation, as well as the follow-up.

Note regarding the examination requirements in Module 14:

Applicability: SoA

Goal, Content and Literature in Module 14

Goal:

The students continuously develop the skills acquired in the modules SOA1, SoA4, and SoA9 and create a final presentation of their artistic work. They are able to work along students studying KS and TTS, can recognize artistic qualities with its characteristics and convey those. The students have independently developed a range of methods and are able to work interdisciplinary, to represent their field verbally and develop it further with the help of the other disciplines. They can include all competencies gained in SoA1, SoA4 and SoA9 into their occupation as a social worker or rather the intersection of art/cultural education - social work.

Content:

The students design and realize an artistic final presentation alone or in their peer-group. The presentation can be related to various artistic, social or cultural contexts. Concept and realization of the work will be presented and is open to all students and employees of the university. The support of the students takes place through mentoring and colloquiums. Evaluation methods of social work.

Goal, Content and Literature in Module F3

Goal:

The students know the fundamentals of the social and educational science as a chosen professional perspective on their future occupational fields. They can reflect on their artistic and scientific experiences and knowledge. They can reflect on their professional orientation interdisciplinarily. They learn how to deal with artistic processes and the scientific sources relevant to their field of study and can work on a specific question.

Content:

The focus of module F3 is on the scientifically justified reflection capability. Different scientific perspectives of the current society and fundamental problems of the human self-conception are productively being connected. The module serves the training of the reflection competences, related to aesthetic perception and the practice of power of judgment. It provides knowledge of the theoretical and methodical fundamentals of the arts and science beyond the borders of their particular discipline. It trains the interaction with complex communicative processes and leads to the acquirement of communicative competence in view of societal fields. Apart from the obligatory seminars, the students can choose from a range of classes in basic as well as related studies, relevant for their field of studies. Examples for seminars in the Studium Fundamentale are: Art theoretically valid models of interpretation, Phenomenology of perception, Types of teaching and learning.

Literature:

Note regarding the examination requirements in Module I:

Applicability: KS, TTS, FK, SoA

Goal, Content and Literature in Module I

Goal

The module gives students the possibility to develop an individual profile in regards to their specific professional orientation. It promotes social commitment as well as student mobility by simplifying the creditability of credits earned abroad as well.

In the position forum, students get to know current artistic and scientific positions given the implementation in the Arts in Social Contexts. They learn about discipline-specific and interdisciplinary discourses and how to reflect upon these in regards to their professional field. Through that, the position forum offers insights into the self-organization of the studies.

The research forum enables the students to research and apply methods and approaches autonomously, in recourse to specific research questions, as they arise from professional practice modules and conceptional observations of the artistic and scientific final theses.

Content

In the module, the courses from different areas are combined to profiled course sequels, which allows students who for example change their major to purposefully acquire competences in regards to enrolling in the Master program "Art and Theater in Social Contexts (M.A./M.F.A.). The position forum and research forum are also located within the module. The position forum takes place in the form of lectures and lecture series, which are complemented by discussion forums. The research forum offers a platform for the exchange of research perspectives from different disciplinary approaches.

Social credit points are awarded to students who are involved in community and university politics in the sense of service learning. They are awarded for social and voluntary commitment. Creditable activities are, for example, participation in student initiatives, representation of the student body in university committees, involvement in the AStA, supervision of exchange students or similar. Creditability is checked by the module coordinators. Remunerated activities cannot be credited.

Remarks

The crediting of credit points acquired at other universities and competences acquired in other professional fields is possible.

Literature

Will be announced in the seminars.

Goal, Content and Literature in Module 12

Goal:

The students are able to narrow down and work on a specific topic, dealing with a specific question while using scientific criteria and methods. They can understand and add their research results as a contribution to the professional discourse. They are able to develop questions related to organizations and institutions, reflect on them and place them in the context of the professional discourse.

Content:

- Deepening of scientific methods and criteria of good scientific practice
- presentation of scientific questions, Exposé
- Forms, obstacles and possibilities of scientific writing
- formulating the bachelor thesis with the extent of 30 pages
